# Pilot Operated Directional Valves

These valves perform a change over of spool by hydraulic pilot and shift the direction of oil flow.

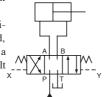

# Specifications

Note: Max. flow in the table above represents the value in the flow condition of  $P \rightarrow A$   $\rightarrow B \rightarrow T$  (or  $P \rightarrow B \rightarrow A \rightarrow T$ ) as shown in the circuit diagram right.

In case the valves is used in the condition that eihter A or B port is blocked, the maximum flow differs according to a hydraulic circuit, therefore, please consult us for details.

- ★ 1. Varies depending on the spool type. For more information, see page 388 for the List of "Standard Model and Maximum Flow" (DSHG-04) for Solenoid Controlled Pilot Operated Directional Valves.
- ★ 2. Varies depending on the spool type and pilot pressure. For more information, see page 389 for the List of "Standard Model and Maximum Flow" (DSHG-06) related to the Solenoid Controlled Pilot Operated Directional Valves.
- ★ 3. Varies depending on the spool type and pilot pressure. For more information, see page 390 for the List of "Standard Model and Maximum Flow" (DSHG-10) related to the Solenoid Controlled Pilot Operated Directional Valves.
- 4. Minimum Pilot Pressure for the models with pilot piston is 1.8 MPa (260 PSI).

Yuken can offer flanged connection valves described below. Consult us for the details.

#### Pressure Drop

Same as those for Solenoid Controlled Pilot Operated Directional Valves. See pages 392 and 393 for the related information.

#### Instruction

• In case of Spring Offset Models, directly connect the pilot pressure port "Y" to the reservoir as a drain port.

## Options

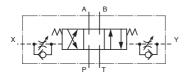

#### Models with Pilot Choke Adjustment (C2)

When the adjustment screw is turned clockwise, changeover speed of the spool becomes slow. In case of the spring centred valves in particular, making slow of the returning speed of the spool to the neutral position is possible with a C2 choke valve.

These choke valves can be used in combination with valves of spring centred, no spring, spring offset, pressure centred and the valves with stroke adjustment.

#### Graphic Symbols

Spring Centred Models

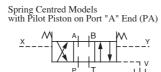

#### Models with Pilot Piston (P\*)

The valves with a pilot piston can be used when the high speed changeover of the spool is required. However, please note that in case of spring centred valves, there is no change in the returning speed of the spool to the neutral position even with the pilot piston.

# Graphic Symbols

Spring Centred Models with Pilot Piston on Both Ends (P2)

# Pressure Centered Models (3H \*)

The pressure centred type can be used when the returning of the spool to the neutral position is required to be done firmly.

Graphic Symbol

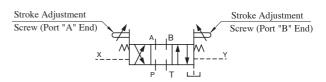

#### Models with Stroke Adjustment (R \*)

When the adjustment screw is screwed in, the spool stroke becomes short and flow rate reduces

Graphic Symbol

Spring Centred Models with Stroke Adjustment on Both Ends (R2)

#### **Additional Mass of Options**

Add the mass described below to the mass of standard models on page 423 if options are required.

kg (lbs.)

Model	With Pilot	With Pil	ot Piston	With Stroke	Adjustment
Numbers	Choke Valve	P2	PA PB	R2	RA RB
DHG-04	0.65 (1.4)	_	_	1.0 (2.2)	0.5 (1.1)
DHG-06	0.65 (1.4)	1.0 (2.2)	0.5 (1.1)	1.2 (2.6)	0.6 (1.3)
DHG-10	0.65 (1.4)	3.6(7.9)	1.8 (4.0)	3.7 (8.2)	1.85 (4.1)

<sup>•</sup> Sub-plates are shared with those for Solenoid Controlled Pilot Operated Directional Valves. Refer to pages 401 to 403 for dimensions.

# ■ Valves Using Neutral Position and Side Position (Special Two Position Valve)

In addition to the standard two positions valves (2B\*), the following two types of two positions valves are available: valves with neutral position and pilot Y pressure position  $(2B*\underline{A})$ , valves with neutral position and pilot X pressure position (2B\*B).

#### **Options**

Models with Pilot Choke Valve DHG-04-\*\*\*-C2

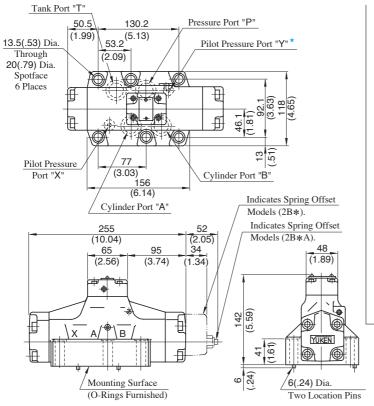

## Models with Stroke Adj. (R\*)

Outside dimensions are the same as those of the main valve of Solenoid Controlled Pilot Operated Directional Valves (DSHG-04). See page 405.

★ For Spring Offset Models (2B\*, 2B\*<sup>A</sup><sub>B</sub>), it functions as drain port. When that model is used, directly connect it to the reservoir.

#### DHG-06-\*\*\*-50/5090

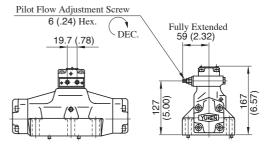

Note: For the valve mounting surface dimensions, see the dimensional drawing of the sharable sub-plate in page 402.

#### Mounting surface: ISO 4401-AE-08-4-A

#### **Options**

Models with Pilot Choke Valve DHG-06-\*\*\*-C2

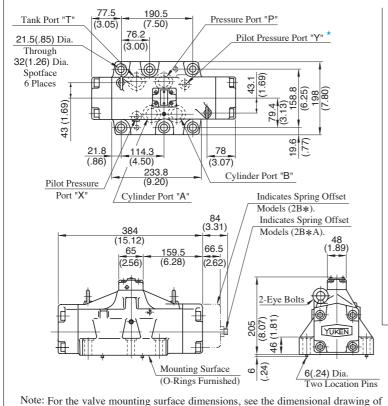

- Pressure Centred Models (3H\*)
- Models with Stroke Adjustment (R\*)
- Models with Pilot Piston (P\*)

The outside dimensions of the above options are the same as those of the main valve of Solenoid Controlled Pilot Operated Directional Valve (DSHG-06). See page 405.

★ In case of Spring Offset Model (2B\*, 2B\* $_{\rm R}^{\rm A}$ ), it functions as a drain port. When that model is used, directly connect it to the reservoir.

> **DIMENSIONS IN** MILLIMETRES (INCHES)

#### DHG-10-\*\*\*-40/4090

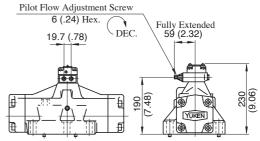

the sharable sub-plate in page 403.

Mounting surface: ISO 4401-AF-10-4-A

## **Options**

Models with Pilot Choke Valve DHG-10-\*\*\*-C2

- Pressure Centred Models (3H\*)
- Models with Stroke Adjustment (R\*)
- Models with Pilot Piston (P\*)

The outside dimensions of the above options are the same as those of the main valve of Solenoid Controlled Pilot Operated Directional Valves (DSHG-10). See page 405.

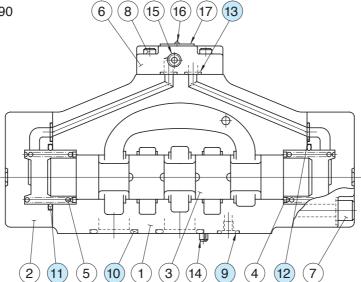

★ In case of Spring Offset Model (2B\*, 2B\*<sup>A</sup><sub>B</sub>), in functions as a drain port. When that model is used, directly connect it to the reservoir.
